New to GitHub? [Create an account.](#)

4. Presione la opción Create repository (Crear repositorio).

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner:  rbarturen /

Repository name *

Great repository names are short and memorable. Need inspiration? How about [cautious-palm-tree](#)?

Description (optional)

☒ **Public**
Anyone can see this repository. You choose who can commit.

☐ **Private**
You choose who can see and commit to this repository.

Skip this step if you're importing an existing repository.

☐ **Initialize this repository with a README**
This will let you immediately clone the repository to your computer.

Add .gitignore: **None** / Add a license: **None** ⓘ

5. Ingrese un nombre para su repositorio (Nota: Para usar GitHub Pages el nombre del repositorio deberá ser **USUARIO.github.io**, en este caso sería **rbarturen.github.io**). Por ejemplo: dev
